📁 PROJECTS

Pregnancy Detection System

Developed a Pregnancy Detection System in C, focusing on simplicity and effectiveness. The console-based application utilizes only two key inputs to predict the likelihood of pregnancy.

Diabetes Prediction System

Developed a streamlined Diabetes Prediction System in C, employing essential parameters - age, glucose level, and family history.

Calculator

Developed a simple calculator application to perform fundamental arithmetic operations.

My Portfolio

Created a visually appealing personal portfolio website using HTML and CSS. The website serves as a showcase for my skills, projects, and professional experience.
